CREATING ADVANTAGE

Business Start Ups

As members of the ICAEW Business Advice Service, Smailes Goldie can show you how to start up a business and run it with confidence.

We offer a free initial one hour consultation at no charge to SMEs and start-ups. For start-ups this typically includes:

- Discussing your business idea and assessing the business viability.
- Advising on the legal structure of the business – a partnership, limited company or sole trader.
- Looking at the taxes associated with the business, like PAYE, National Insurance, VAT, Corporation Tax and basic tax planning.
- Advising on bookkeeping requirements, other administrative matters and the availability of grant funding.

After your first meeting with us, we can instruct the incorporation of a new company, register your new business with HMRC, help set up business bank accounts, advise who to talk to and liaise with banks on your behalf. If bank funding is needed, a detailed business plan and financial forecasts will almost certainly be necessary, which our Corporate Finance team can deal with.

Smailes Goldie Financial Management, our financial services provider, also offers a free consultation tailored towards start-up businesses, offering expert advice on matters such as pensions, business protection insurances and investments. Meanwhile, our specialist outsourcing department, SG Outsourcing, can help set up bookkeeping systems and assist with payroll.

We will also put you in touch with trusted solicitors who can advise on employment contracts, property leases and other legal services typically needed when setting up in business.

Above all, we can give you the peace of mind that our team of specialists is working hard to ensure your new business grows into a successful one.

If you would like more information about how we can help you, please call us on **01482 326916** or **01652 632927** to arrange a free, informal consultation. Alternatively, visit our website for more details.
